

## Care Plan for a child with long term medical conditions

A care plan is to be used for children with long term medical conditions, such as epilepsy, asthma, diabetes and children who need ongoing medication, medical treatment or a special diet.

The care plan should be drawn up with parents or carers and health professional where appropriate.

Name of child:		
Details of the condition:		
Special requirements for example: dietary needs, allergies, pre-activity precautions		
Medication needs and any possible side effects of medication.		
What constitutes an emergency.		
What to do in an emergency		
What <b>not</b> to do in an emergency		
Who to contact, including telephone numbers.		
The role of staff		
Parent/carer signature:	Health professional signature (where appropriate):	Play leader / Childcare provider signature:
Date:	Date:	Date:
Review date of care plan:
